Right Networks

Right Networks Hosting

www.Rightnetworks.com

From the Oct. 2018 reviews of Cloud Hosting systems for accountants.

Right Networks Hosting is designed for CPA firms, accounting firms, and small businesses. Specializing in QuickBooks hosting, Right Networks can host more than 150 applications on the cloud. Right Networks is scalable, with three editions of hosting available to choose from, with users able to easily scale up to the next version when needed.

Right Networks currently offers 99.999 uptime using HyperRight Technology®, where users log into a pool of servers instead of a dedicated server, automatically routing users to the most available systems at the time of login. This reduces or eliminates downtime typically experienced during hardware failures or maintenance issues. Right Networks uses multiple data centers, that are located more than 2,000 miles apart and include redundant power systems, onsite power generation, and redundant battery backup. Data servers are secure at all times, with 24/7/365 onsite security guards, complete data encryption, and secure backups. Right Networks also offers a rolling 90-day retention of all data stored.

All programs hosted by Right Networks are mobile-friendly and can be accessed using any device including smart phones and tablets.

Right Networks can host the 2016 or later versions of QuickBooks Desktop, with all editions available, including Pro, Premier, and Enterprise. Those without a current

QuickBooks license can purchase the product directly from Right Networks if desired.

integration or syncing with online applications such as Expensify, Bill.com, and T-Sheets. Microsoft Excel hosting is also available. A QuickBooks Desktop option is available for those that simply want QuickBooks hosted.

Right Networks offers 24/7/365, U.S. based support for all system users. Right Networks utilizes a user management portal for easy support access, with users simply logging into the Right Networks Helpdesk in order to access account detail, manage billing and invoices, or purchase additional products. Users can also access additional help and support features including a chat option, product knowledgebase, and support ticket status and history. Toll-free support is also available. There are also a variety of videos and webinars that can be accessed from the Right Networks website, with a variety of resource documents available as well. In addition to general support options, all users are assigned an account manager that can assist with the transition to the cloud.

Right Networks offers three hosting plans; QuickBooks Desktop Cloud, Business Cloud, and Application Cloud. The QuickBooks Cloud plan is $50 per user per month; the Business Cloud plan is $59.99 per user per month and includes QuickBooks hosting along with Microsoft Excel, along with connectivity with online applications such as Expensify, Bill.com Sync., and T-Sheets. The Application Cloud plan is $69.99 per user per month and includes all of the options available on the first two plans along with additional storage and Microsoft Office 2013 hosting. All plans include 24/7/365 customer support. Users can also opt to purchase various Transaction Pro options, which offer importing and exporting of transactions to and from QuickBooks applications.
