Saving Tool For Small & Medium-Sized Multinational Businesses Including Process Manufacturers

Feb. 16, 2009

Latest Release Offers New Tools to More Effectively Manage Business Operations

Irvine, Calif. – February 11, 2009 – Sage North America announced today the availability of Sage PFW ERP 5.7, the new version of the company's enterprise resource planning (ERP) system designed for small and medium-sized multinational businesses including process manufacturers. Its new money- and time-saving features can help contribute to improving a company's bottom line. Sage PFW ERP 5.7 also offers an improved user interface that includes new fields, expanded field sizes, and other improvements in direct response to customer feedback.

"Sage PFW ERP helps companies become more efficient in their daily business management tasks so they can focus more time and energy on strategic projects that generate revenue," said Sam Hunter, Sage North America senior vice president and general manager, Business Management Division. "Version 5.7 exemplifies our continued focus on our customers, and our ongoing commitment to help make business management as simple and cost-effective as possible."

Key money- and time-saving new features and enhancements in Sage PFW ERP 5.7 include:

Money-Savers

1. Streamlined Inventory functionality-Version 5.7 offers tighter

3. Improved Customer Account management-The ability to write off small balances of overpayments and underpayments while processing cash receipts helps provide more accurate customer balances and better determine customer creditworthiness.

4. Enhanced Sales Order Pricing-Business owners can quickly verify correct pricing by checking price overrides using a new option in the Sales Order report, which highlights price changes and compares new pricing to original prices.

Time-Savers

1. Faster Month-end reporting-Utilizing new bank statement import functionality, version 5.7 provides a faster, more automated way to reconcile bank accounts and complete monthly reports.

2. Better Multiple Company processing-Users can more easily switch between multiple companies and manage workload, reducing the possibility of errors when processing data for two or more companies.

3. More efficient Document processing-Users can now print and post documents directly from Accounts Receivable, Purchase Order, and Order Entry data entry screens.

4. Automated installation-Companies with multiple locations and workstations can quickly deploy version 5.7 and subsequent service packs utilizing a new automated process across their enterprise.

Pricing and Availability

Sage PFW ERP 5.7 is available now through local, authorized Sage PFW
