Systems

DacEasy
offers smaller retailers a solid entry-level product that can be used as a stand-alone product or integrated with the DacEasy Accounting products for a complete front/back
office financial solution.

EASE OF USE:
DacEasy utilizes the Business Center, a user-friendly interface that contains a menu bar at the top of the screen that offers access to product functions, such as Profile, Tool, Windows and Help. Directly to the right is a list of installed modules. If the POS is used stand-alone, it will be the only function visible. If used with DacEasy Accounting functions, users will also see Accounting, Payroll, Order Entry and Crystal Reports listed. The Business Center also offers quick access to frequently used functions, as well as the Resources list.

Sales transactions are processed by first signing into the register and then using the Sales Register Entry. Sales entry can be a bit slow initially since various options such as lookup are accessed from the right side of the transaction entry screen. However, hot key functions are available to use for quicker processing. Other options available include OK, Add, Layaway, GoTo, Delete and Options, which leads to various POS functions including Calculator, Quotes, Split Tender, Refund/Reissue. Items, customer and sales information can all be added on the fly, and tenders can be split when needed. Receipt numbers are added by the system automatically. Edit and processing screens are set up similarly, with easy navigation throughout the program. Even new users will find themselves comfortable with DacEasy almost immediately, so training time will be minimal.

MODULES/SCALABILITY:

of DacEasy with Sage Payment Solutions, simplifying the processing of credit and debit cards. Other system enhancements can be found throughout the various DacEasy modules.

One of the advantages of using DacEasy is the ability to enter sales transactions, quotes and layaways from the same entry screen. The sales register is easily customizable, allowing users to choose various options such as setting defaults and entering tables that contain data to access when entering a sale.

DacEasy POS also allows for promotional prices for all products. Additionally, there is an option to enter services and assign them a price, making DacEasy a great option for retailers that offer related services to their customers.

INTEGRATION:

DacEasy by Sage modules are all completely integrated for a full front/back office solution. The product also easily integrates with standard POS hardware, including pole displays, magnetic card readers, cash drawers, keyboard wedges and serial barcode readers.

The File Import function allows for the import of ASCII files. Users can also use the Export Sale Transaction dialog box to export sales receipts, cash in/out transactions, and refunds into a text file.

TRACKING/REPORTING:

DacEasy by Sage contains a fair amount of reporting options, including the following:

Sales Analysis, Layaway Transactions, Product Activity Detail and Credit Card Transactions. The Audit Trail Log provides a detailed history of certain types of system actions including any additions, insertions or deletions of system data. Customer purchasing history reveals purchase totals and payment history

by any date range. An Edit Customer option allows for user-defined text fields

2009 Overall Rating:

CPA Practice Advisor is registered with the National Association of State Boards of Accountancy (NASBA) as a sponsor of continuing professional education on the National Registry of CPE Sponsors.
