DMI's flagship interest and penalty software InterestNetTM is a single product solution for interest calculations on federal IRS and state tax underpayments and overpayments. InterestNetTM is the industry standard interest and penalty computation software and accurately computes global interest netting benefit per Section 6621(d). The user-friendly interface allows for easy entry of transcript detail while providing the flexibility to perform restricted interest computations, evaluate alternative interest results for hypothetical events, and perform "what if?" scenario development.

The IRS uses InterestNetTM to perform net rate interest netting computations, per IRM 20.2.14.1. Be confident your interest results are accurate with InterestNetTM.

CPA Practice Advisor is registered with the National Association of State Boards of Accountancy (NASBA) as a sponsor of continuing professional education on the National Registry of CPE Sponsors.
