processing

May. 11, 2010

Red Wing, MN – May 11, 2010 – Red Wing Software, Inc. announces the release of TurningPoint Accounting Version 7. The new release provides users instant access to crucial information about customers, items, and vendors, and also offers new tools for processing payments that will streamline workflow and shorten processes.

Three new function key commands are now available in TurningPoint to help users find the information they need instantly. The F8 key displays the Vendor Inquiry screen, F9 the Customer Inquiry screen, and F10 displays the Item Inquiry screen. All three commands work from anywhere within the TurningPoint system. This new capability allows users to access important information, without leaving their current task or having to open a new module window.

New payment processing tools are also available, including a prompt to print checks for overpayments, an automated process for applying overpayments to the oldest open invoice, and setting up recurring payments as paid transactions.

“Our customers wanted an improved and faster way to look up information, while continuing to complete their current process within TurningPoint. We feel the new function keys F8, F9 and F10 instant lookups are an excellent way to resolve this and are confident our customers will appreciate the new feature,” says Jon Isackson, Red Wing Software Product Manager, “The new payment processing flexibility will also help customers complete payment tasks more efficiently.”

Version 7 also offers the ability to include service items (inventory items
