of their clients lives on a daily basis, including solicitors, CPAs, and physicians. Instead of continuously sending emails with attachments which may or may not be received, SecCom allows you to message your clients and see when each message is read. We also integrate SecCom seamlessly with your current design so that your clients never have to leave your website.

Jun. 23, 2010

SecCom is a login-based website that integrates with your own website. This allows you to maintain secure email communication and document exchange with your clients without the chance of anyone intercepting or reading it.

Because SecCom utilizes the same security as all major eCommerce businesses you can be sure your clients' privacy is safe but still easily accessible to you.

- Custom designed to seamlessly integrate with your current site for a consistent user experience
- Log-in based web portal
- 128 bit SSL security
- Upload attachments
- Manage client profiles

- Create client groups for easy communications
- Manage unique site administrators for internal employees
- Unlimited data storage
- Optional email notification of newly posted messages
- Affordable, cost effective

SecCom will help you reduce operational costs, receive sensitive client documents more quickly, improve customer service, and provide you peace of mind in knowing that your business' communications and documents are secure.
