provide a paperless centralized location for support documents. Imagine looking at the job report and with an easy click on the link, being able to view progress photos, blueprints or even the job schedule specific to that location.

Another feature exclusive to BIS is Drill Down + [®]. This feature allows reports to now show hyperlink fields. Like standard drill down, users can “Drill Down” to another report to edit related information in Master Records or Transactions. The “Plus” part of Drill Down + allows users to open a complete list of documents and editing functions associated with the selected field. Finding where figures come from has never been easier. Users can even customize the drill down so that with a single click it takes them back to a specific report every time.

Stepping even closer to high efficiency for accounting, BIS also introduced its new Report Server module in 2008. Report Server, a breakthrough in reporting technology exclusive to BIS, makes manually running recurring reports a thing of the past. This tool enables automatic, scheduled distribution of report groups of from Report Queue. With Report Server, you choose which reports, formats, schedules, recipients or groups, and whether you prefer to have them printed, saved or emailed and when. Report Server takes it from there. It will query the reports on the recurrence schedule you specified, with the current data and export them in one of the six optional formats, more than anyone else in the industry. Whether it is the company president traveling, the manager at a job site or the bonding company needing their weekly work in progress information, Report Server can provide them with the up to date data they require even after business hours. Just set it and forget it. Report Server does the work for you.

BIS strives to constantly take construction accounting software to new heights. It is compatible with Windows 7 and Vista and has many features of which will assist in making your company's accounting more accurate and efficient. With its Historical

Fiscal Years feature, users have the ease of looking back at prior years in BIS with the
