## Headaches

Oct. 26, 2010

RALEIGH, N.C. – October 26, 2010 – KnowledgeTree, provider of cloud-based document management solutions, today announced a product update that strengthens user security and alleviates the problems associated with juggling multiple access passwords. KnowledgeTree's partnership with OneLogin delivers a single sign-on functionality that allows customers to use one set of secure log in credentials to access KnowledgeTree's document management software as well as all their other cloud-based applications.

By partnering with OneLogin, an identity management and single sign-on provider for cloud companies, KnowledgeTree is again simplifying the document management process. Users now are able to access and process invoices, contracts, and other documents faster than ever before through automated, secure log-ins. Forgotten passwords are a thing of the past; users who lose their log-in information no longer have to waste time requesting the correct password be sent to them. Accessing documents in the cloud has never been easier, and it's never been safer, either.

KnowledgeTree is one of a growing number of OneLogin partners that leverages OneLogin's free SAML toolkit to eliminate the need for passwords, making it safer and easier for users to access their documents in the cloud. Companies can eliminate the risk that comes with weak employee passwords ("123456" and "letmein" won't cut it anymore), and documents that are stored safely in the cloud stay there.

KnowledgeTree joins OneLogin's existing directory of more than 1,000 leading cloud applications, including Salesforce.com, Yammer, and Zendesk. OneLogin users are now able to access KnowledgeTree in one easy click, and can experience the value

that KnowledgeTree's SaaS solution provides to hundreds of midmarket

ability for OneLogin customers to access our system through the application directory.”

“We applaud KnowledgeTree’s visionary thinking when it comes to identity management. They know, as any other cloud application knows, how important security is to businesses considering the move to the cloud,” said Thomas Pedersen, CEO of OneLogin. “By partnering with OneLogin, KnowledgeTree will be able to better address the concerns of midmarket businesses storing sensitive documents in the cloud, and enhance their overall security offering.”

### About KnowledgeTree

KnowledgeTree makes sharing content and controlling document processes simple with secure, affordable online document management solutions for growing SMBs and departments at larger companies. Designed for business professionals, KnowledgeTree is easy to use, does not require extensive training and enables content to be accessed and managed anytime, anywhere via cloud computing. Rich and open APIs allow for seamless integration of popular third party business applications.

KnowledgeTree accelerates return on investment by streamlining document-centric business processes and increasing collaboration with workflow, document alerts, version control and full transaction histories. KnowledgeTree is headquartered in Raleigh, North Carolina. More information at [www.knowledgetree.com](http://www.knowledgetree.com).

### Technology

CPA Practice Advisor is registered with the National Association of State Boards of Accountancy (NASBA) as a sponsor of continuing professional education on the National Registry of CPE

Sponsors.
