Changes on Home Page Enhance Ease of Use

Right off the bat, users will notice a new look to the home page designed for easier reading, browsing and navigation. Tabs now stretch across the top of the screen for better organization and the dividing bar moves to the center of the page for better use of the all-new browse tree, which now opens in a larger window.

"So many of the new features make *IntelliConnect* easier and faster to use, I really liked the expanded browse tree pane, the ability to advance search and the Read Next/Previous buttons," said Kathleen Clark, Partner with the CPA firm of Clark & Srsich LLC. "*IntelliConnect* continues to get better and better."

Searching for specific information through the browse tree has also become easier with new functions to pinpoint specific content titles. One click of the new (+) or (-) icons on the left side of the home page expands or contracts the content search list – meeting the user's information needs.
