([http://www.pcworld.com/article/223014/make\\_multiple\\_monitors\\_work\\_for\\_you.h1](http://www.pcworld.com/article/223014/make_multiple_monitors_work_for_you.h1))

In case you've missed the major transition, surveys now show that more than half of accountants are already using multi-screen monitors. And heck, here at CPA Practice Advisor (that's our new name starting in April/now), we've long praised the benefits and have been raving about the productivity boost of multiple monitors since at least 2005 when I wrote on the subject (<http://cpata.com/go/721>).

Of course, back then, we only recommended a couple of monitors for most professionals, three for the really savvy. Now dual monitors has become pretty much standard in tax and accounting firms... \*standard\*! For those who might think the profession is stodgy and afraid to adapt new technologies, this is a great example of how the profession actually often leads the mainstream adaptation rates.

How many monitors do you have, and how many would you really like?

#### Benefits

CPA Practice Advisor is registered with the National Association of State Boards of Accountancy (NASBA) as a sponsor of continuing professional education on the National Registry of CPE Sponsors.
