accounting or general ledger, which has been rebranded as RedGear Accounting for users of the TaxWorks professional tax preparation system. It's also a good fit for firms or companies who want an on-premises payroll application designed for quick data entry.

Strengths

- CYMA's long history as a write-up application makes for quick & efficient data entry, with support for multiple clients & after-the-fact payroll.
- Custom reporting & modification of existing reports supported with Crystal Reports.
- Available add-ons provide employee self-service access to routine information changes & pay stubs, as well as HR management capabilities.
- Employee time keeping is supported & supervisors can edit and approve data before it is released to payroll.

Potential Limitations

- Electronic payment transmission of federal and state payroll taxes not currently supported, but will be in the next release of the product.

SUMMARY & PRICING

CYMA Payroll Software provides a flexible payroll solution that may be configured for most business environments, from an accounting professional performing outsourced payroll for clients to a large professional employer organization. With the ability to process an unlimited number of companies, CYMA Payroll Software may prove to be a cost-effective payroll solution. Pricing is tiered based on the

number of employees processed in the largest company file. Pricing for unlimited
