Taija Sparkman • Jan. 25, 2012

Doc.It, a provider of document management and archiving applications, launched a new website designed to provide customers with a seamless user interface.

The new Doc.It website allows users to explore Doc.It's entire library of information and learning opportunities. By logging into the Client Resource Center on the website, users can access training videos, software release notes, user guides, and technical support.

"We are aware that accountants are becoming more self-directed in their search for technology to help streamline their workflow," said Howard Brown, President and CTO, Doc.It. "The ease of navigation within our new website gives managing partners the information they need to make informed and confident decisions about document management and archiving technology."

Visitors without login credentials will still have access to Doc.It Suite product information, training and support, case studies and Doc.It's ROI calculator. The Doc.It Suite includes Doc.It .NET Client Portal, Doc.It Archive, Doc.It WorkFlow Manager, Doc.It Binder, Doc.It Publisher, Doc.It Scan and Form Recognition, Doc.It PDF Editor, and Doc.It Tax and Accounting Software Integration.
