depreciation, and a holistic view of assets' book and tax value.

May. 07, 2014

The BNA Fixed Assets G/L Integrator 1.0 solution has achieved certified integration with SAP ERP, Bloomberg BNA announced on Wednesday. The system has been proven to integrate with SAP ERP, which offers businesses using the system to gain automated data reconciliation for fixed asset depreciation, and a holistic view of assets' book and tax value.

BNA Fixed Assets G/L Integrator software delivers a comprehensive and flexible system to help customers accurately and confidently manage their company's fixed assets and depreciation. The SAP Integration and Certification Center (SAP ICC) has certified that BNA Fixed Assets G/L Integrator 1.0 integrates with SAP ERP, enabling the program to exchange critical data with instances of SAP software.

“We are delighted to announce the successful achievement of SAP certification for BNA Fixed Assets G/L Integrator software,” said Dean Sonderegger, Executive Director, Product Management, for Bloomberg BNA's software segment. “The ability of BNA Fixed Asset Software to leverage the business potential of assets provided by solutions from SAP and other vendors will prove highly beneficial to current and future customer engagements.”

As a result of the certified integration, BNA Fixed Assets G/L Integrator now automatically extracts data on asset dispositions, transfers, and modifications from SAP ERP, helping eliminate manual processes and further ensuring business continuity for clients. The integration also supports clients' compliance efforts by providing access to a product that is up to date with the most current tax reform regulations.
