and 97 of the top 100 U.S. law firms.

Now, after over two years of development, extensive customer input, and a multi-million dollar investment, Thomson Reuters has launched Checkpoint Catalyst – making Checkpoint better than ever.

“As the complexity of legal requirements and exceptions has expanded, so has pressure to find 'the right answer' as efficiently as possible,” said David Houlihan, principal analyst with Blue Hill Research. “Checkpoint Catalyst represents a clear response to this need by enhancing their database with capabilities that promote rapid comprehension of concepts and their practical applications.”

Steve Mendelsohn, managing director of knowledge solutions for the Tax & Accounting business of Thomson Reuters, added: “Checkpoint Catalyst transforms the tax research process for complex tax issues and business-related transactions. It provides research content in context, enabling our customers to move from insight to action swiftly and easily.”

Newly authored by tax experts and designed specifically for the web, Checkpoint Catalyst is:

- Organized so users can easily view all relevant content on one page – saving research steps and reducing the risk that something important could be missed.
- Complemented by author commentary highlighting details that might pose a risk – or an opportunity – when managing a specific business issue.
- Designed to support quick lookups as well as detailed research – enabling users to quickly get up to speed or gain additional expertise on a particular type of transaction.
- Embedded with easy-to-use and actionable interactive tools – diagrams, decision-trees, charts, calculators, and document assembly applications – guiding users to

the answers and outcomes they need.

At the same time, Thomson Reuters Checkpoint – including Checkpoint Catalyst – has been enhanced with intuitive search functionality, allowing tax and accounting professionals to search the way they think. Triple-powered relevancy makes use of technological innovation, editorial insights, and user behavior patterns to simplify the research process, quickly getting practitioners the most pertinent results.

“Checkpoint Catalyst is another major step forward in a product that already had good usability,” added Randy Johnston, executive vice president with K2 Enterprises. “The design makes research faster, easier and more comprehensive with fewer steps. If you haven't recently considered how research is being done at your firm, it is time to review this product.”
