If you have any questions or need help you can email us

- Support for complex account & department structures (up to a total of 50 characters)
- CMS SinglePoint Server allows remote access; database can easily scale to support up to 100 users
- Strong inventory support includes options for FIFO, LIFO, Weighted Average & Standard Cost valuation
- Multiple currencies supported

## **Potential Limitations:**

- Denali Payroll & Fund Accounting modules will not launch until later this year
- Limited market penetration means many first-time users will require additional training

## **Executive Summary & Pricing:**

Denali is an excellent accounting product for small to mid-sized businesses. It's extremely flexible and can easily grow along with the business. With solid accounting functionality as well as specialty products available for retailers, and a Fund accounting module to be released at the end of April, Denali definitely moves Cougar Mountain Software into the big leagues. Standard modules are \$599 each with a \$295 user license required, as well.
