2011 Overall Rating 4.75

Best Firm Fit:

CNG will fit in many different types of businesses, including, but not limited to, accounting and tax firms, as well as many of their clients. CNG is priced on a per-user model that allows organizations to increase or decrease the number of licensed users to meet the needs of the organization.

Strengths:

Hello. It looks like you're using an ad blocker that may prevent our website from working properly. To receive the best experience possible, please make sure any blockers are switched off and refresh the page.

If you have any questions or need help you can email us

- Lack of pre-built integration with popular tax & audit software
- The pricing is a little on the high side for the hosting solution

Executive Summary & Pricing

CNG is a very impressive solution. I like the fact that it is designed as a horizontal solution that can fit the needs of many different types of businesses. The integration with QuickBooks is a valuable bonus for organizations that work with QB. The pricing model is \$495 per view license, \$995 per dedicated user, or \$1,395 for a shared concurrent user license for an on-premise deployment. The SaaS model is priced at \$50 per user per month. Volume pricing will be applied based on the total number of users for both the on-premises and SaaS models.

Delivery methods:

☒ On-Premises

☒ SaaS

☒ Hosted by Vendor
