Intuit Online Payroll for Accountants

Accountants.intuit.com

888-236-9501

[From the 2017 review of professional payroll systems.](#)

Intuit Online Payroll for Accountants is designed for professional accounting firms that wish to offer payroll processing services to their clients. The product is best suited for firms using other Intuit/QuickBooks products.

Intuit Online Payroll for Accountants offers easy online access from desktop, laptop, tablets and mobile phones. The Client Overview screen doubles as a dashboard of sorts, providing users with quick access to all payroll clients. Users can also access their own payroll from this overview screen as well.

Once a client is chosen, the screen is populated with a to-do screen specific to that client, which details all of the outstanding tasks that need to be completed prior to processing payroll. Intuit Online Payroll also offers complete branding capability. Automated reminders such as when a client's payroll needs to be processed are automatically sent, ensuring that a payroll deadline is not missed.

Intuit Online Payroll supports direct deposit and handles after-the-fact payroll as well. Tax tables are available for all 50 states, and users will also receive an email when taxes are due; much like the email sent when payroll processing is due.

A good selection of reports are available in the product, with reports offering decent customization capability. Users can also export all system reports to Excel for further customization capability. Payroll reports offered in Intuit Online Payroll include Tax Liability, Tax and Wage Summary, Total Pay, Tax Payments, and both Vacation and

Sick Leave reports. As an added benefit, users can create custom report groups specific

Intuit Online Payroll integrates with QuickBooks products including QuickBooks Online, QuickBooks Desktop, and QuickBooks for Mac. The product also integrates with other applications such as Sage 50.

Intuit Online Payroll contains an employee portal, which accountants can offer to their clients. Accountants have the option to offer complete access to all payroll functions, or can choose to limit accessibility to paystubs and W-2's. Firm users can also offer their clients access to complete time entry functions, though employees do not have access to tax withholding or other pay and deduction information. Paycheckrecords.com allows users to quickly email clients and their employees when paycheck stubs are ready to be accessed.

Intuit Online Payroll does not currently offer any HR tools that are designed to integrate with the product. The product also offers accountants various marketing materials and customizable templates that can be used to attract additional clients. Product support is available during regular business hours and is provided by payroll professionals. A product demo and FAQ's are available as well.

A good fit for professional accountants that currently use other Intuit products, Intuit Online Payroll for Accountants is designed specifically for firms that wish to offer payroll services to their clients. With convenient online access, the product can be accessed from anywhere at any time. Pricing for the product starts at \$35.00 per client per month, along with a \$2.00 monthly fee for each employee paid. The cost drops significantly as more clients are added to the practice.

2017 Payroll Rating – 4.5 Stars
