influencing more migration to the cloud. In the survey, the largest percentage of businesses identify security as a benefit of using the cloud.

Oct. 11, 2017

Businesses have become less skeptical of cloud computing, more confident in its security, and more inclined to invest money in it, according to new findings. Nearly 70% of U.S. businesses surveyed by B2B ratings and reviews firm [Clutch](#) say that they plan to increase spending on cloud computing in 2017. One in five of those businesses

report that their cloud computing spending this year will likely increase by more

Cloud is the go-to solution to figure out how to do that.”

Businesses also report having greater confidence in cloud security, possibly influencing more migration to the cloud. In the survey, the largest percentage of businesses identify security as a benefit of using the cloud.

This attitude is a shift from past years, when cloud security was often treated with skepticism and distrust.

When it comes to which type of cloud to use, most businesses are using a private cloud, where services and infrastructure are maintained on a private network. However, over 80% indicate that they are considering implementing or planning to implement a hybrid cloud option in the future. A hybrid cloud has services and infrastructure spread between a private network and off-site cloud provider.

A hybrid cloud offers flexibility and customizable features.

“Customizing your cloud experience allows the customer to leverage different toolsets that’s truly drilled down to their department, their individuals, and how they do business,” said Kevin Rubin, President and COO of [Stratosphere Networks](#), a Chicago-based IT MSP.

Experts emphasize, however, that a business should select an option that best fits their particular needs.

Once the decision is made to adopt cloud computing, many businesses seek outside help for the subsequent installation. Over half of businesses surveyed (57%) say they hire an external consulting firm to help them implement their cloud strategy.

This is a wise decision, especially if a business does not have internal expertise, says Haresh Kumbhani, founder and CEO of [Zymr, Inc.](#), a San Francisco-based cloud

consulting and agile software development agency. He believes that no business will
