result of the recent tax reform, and almost 10 percent of self-employed workers didn't know about the recent tax reform at all.

Apr. 24, 2018

A new survey released by [QuickBooks Self-Employed](#) reveals 32 percent of self-employed workers admit to not reporting all their income.

The data further reveals that 36 percent don't do taxes at all. Of those who don't pay taxes, 9 percent admit to not having a reason (they "just didn't" pay taxes), 17 percent say they didn't make enough to owe taxes, and another 10 percent say they had losses that exceeded their profits so they didn't owe any tax.

One-third of self-employed workers have gotten behind on paying their taxes in the past, are currently behind on their taxes, or expect to be in the future. Fourteen percent of self-employed workers are currently behind on paying their taxes and another 10 percent expect to be.

- More than 1 in 3 of self-employed workers have been audited by the IRS and nearly a third of those audited had errors on their taxes.
- Younger workers are much more likely to have been audited by the IRS. Forty-six percent of 18- to 24-year-old self-employed workers surveyed say they have been audited, compared to only 11 percent of those 55 and older.
- More than a quarter of self-employed workers think they will pay more in taxes as a result of the recent tax reform, and almost 10 percent of self-employed workers didn't know about the recent tax reform at all.
- More than two-thirds of self-employed workers aren't using software to file their taxes. Thirty-one percent still file on paper and nearly a third use an accountant.
- Forty-two percent of self-employed workers age 55 and older file their taxes using software, making them the most likely to use tax software. Only a third of 18- to

24-year-olds use tax software.

1. Getting paid on time (31 percent)
2. Motivating themselves (30 percent)
3. Finding work (26 percent)
4. Doing taxes (20 percent)
5. Finding time for marketing (20 percent)

The top 5 tax-related challenges facing self-employed workers:

1. Filing forms correctly (30 percent)
2. Keeping track of paperwork (30 percent)
3. Estimating how much tax to pay (23 percent)
4. Saving enough money for taxes (20 percent)
5. Finding deductions (17 percent)

Self-employed workers aged 18-34 years struggle more with filling out tax forms correctly, while self-employed workers age 35 and older struggle to keep track of paperwork.

- 35 percent of 18- to 34-year-olds say they struggle with filing tax forms correctly, while only 25 percent of workers age 35 and older say they do.
- Only 25 percent of 18- to 34-year-olds say they struggle to keep track of tax forms, while 35 percent of workers age 35 and older say they do.

The digital breakthrough has yet to come.

- Over two-thirds of self-employed workers are not filing taxes using software.
- 31 percent still file using paper.

- 32 percent file using an accountant.

Business advisors

- Those under 55 who use an accountant tend to use one because they have never done their own taxes and don't want to (37 percent admit to this).
- Workers 55 years and older are the most likely to use tax software to file their taxes, with 42 percent using tax software.

The most common reason people hire an accountant is because they don't want to do their own taxes.

Older self-employed workers see accountants differently.

Older self-employed workers are the most tech savvy.

- ☐ 32 percent file on paper.
- ☐ 21 percent use an accountant.
- ☐ 5 percent say other.
- Exactly a third (33 percent) of 18- to 24-year-old self-employed workers file their taxes on paper.
- ☐ This is higher than the average self-employed worker (31 percent).
- ☐ 33 percent use software.
- ☐ 28 percent use an accountant.
- ☐ 7 percent say other.

- 36 percent have been audited by the IRS.
- Almost 1 in 3 (32 percent) of those who were audited had errors on their taxes.

Being audited by the IRS is common for self-employed workers.

- ☐ This number is higher for part-time/occasional self-employed workers. 50 percent of those audited had errors.
- ☐ 19 percent of those with errors had major errors.

Younger self-employed workers are audited more.

- ☐ Only 11 percent of workers over age 54 have been audited.
- ☐ 46 percent of workers aged 18-24 years have been audited.

It's easy to get behind on your taxes when you're self-employed.

- One-third (33 percent) of self-employed workers say they have previously gotten behind, are currently behind, or will be behind on paying their taxes.
- ☐ 14 percent are currently behind on paying their taxes.
- ☐ Nearly 1 in 5 (19 percent) have previously been behind on paying their taxes.
- ☐ 10 percent expect to be behind on paying their taxes in the future.

The top 5 reasons self-employed workers get behind on paying taxes:

1. Underestimating how much tax they needed to pay (42 percent)

- 10 percent say they had losses exceeding their profits so they didn't owe taxes.
- Over half (54 percent) of part-time self-employed workers don't pay taxes compared to only 27 percent of full-time self-employed workers.

Part-time/occasional self-employed workers are less likely to pay taxes, but mostly because of how much they make.

- 31 percent of those part-time/occasional self-employed workers say they don't make enough to pay taxes, compared to 10 percent of full-time self-employed workers who didn't make enough to pay taxes.

Self-employed workers don't report all their income.

- 6 percent of self-employed workers don't report any of their income.
- 13 percent report half of their income or less on their taxes.
- Only 68 percent report all of their income on their taxes.
- 10 percent of workers 45 years or older reported none of their income in taxes.
- 7 percent of workers aged 18-24 years old reported none of their income in taxes.
- 1 in 10 full-time self-employed workers reported 50 percent or less of their income.

Workers who are most likely to report none of their income are 45 years or older.

Part-time/occasional self-employed workers are twice as likely to underreport their income compared to full-time self-employed workers.

- 3 percent of full-time self-employed workers didn't report any of their income for taxes.

- Nearly 1 in 5 (18 percent) part-time self-employed workers reported 50 percent or less of their income.

○ 10 percent of part-time/occasional self-employed workers didn't report any of
