technology solution built specifically for accounting and finance. No messy acquisitions, no disparate hybrid software-hardware combinations, and no expensive middleware ...

Feb. 26, 2019

BlackLine Accounting Process Automation solution improves the speed, accuracy, and reliability of the reconciliation to adjustment process by automating your routine and high-volume transactional processes. Through configurable, rules-based certification and matching workflows, controlled roles-based access, and automated journal validation, creation, and posting, organizations are able to put an end to mundane tasks and enable teams to apply their valuable skills to larger issues that support strategic business objectives. And by leveraging a combination of data and process standardization, embedded internal controls, and real-time reporting and dashboards, accounting and finance leaders can continuously monitor and evaluate performance to drive further process optimization.

Hardware
