Creative Solutions Introduces Financial Analysis Solution

DEXTER, (Mich.) —

Thomson Creative Solutions has announced the release of Financial Analysis Solution, the latest addition to the Creative Solutions Accounting family of software. The new program is geared toward providing tools for comparing the financial data of two or more client businesses, enabling the benchmarking of the financial position of clients in relation to similar individual or groups of companies. Financial Analysis Solution can also be used to compare against industry standards. “Financial Analysis Solution enables the accountant to provide clients with a better understanding of their financial position,” said Jack LaRue, Vice President of Marketing for Creative Solutions. “By comparing key financial indicators to peers or industry standards, clients can see how their business measures up against similar businesses.”

The new system enables accountants to filter clients used to evaluate financial data based on user-specified criteria, such as industry code or annual revenue,

to increase the value of each comparison.
