## Orrtax

May. 05, 2005

Orrtax ([www.intellitax.com](http://www.intellitax.com)) develops IntelliTax for Windows and IntelliTax Classic, the latter being a DOS-based program. For this tax season, the company has developed a stand-alone fiduciary reporting program and has added several new features to its Windows-based software, including the following:

Central Reporting, which provides remote location data on e-filing and bank products directly from the Orrtax Filing Center for use by the main location

IntelliTax Snapshot provides a tax estimate in minutes, including service/preparation fees

Addition of e-filing to WI, IA, NE and KS

Spanish Tax Checklists for Head of Household, EIC, Taxpayer Organizer Checklist and others

Improved Help utility that offers context-specific help within tax modules and forms

The company also recently announced a partnership with People's Choice Accounting software that will provide small business owners an alternative to programs such as QuickBooks. The addition of integration with People's Choice "provides our clients a robust accounting system that will allow them to customize their business reports, invoices, sales data, and payroll reports along with many other accounting benefits," said Andrew Priest, CEO of Orrtax Software Solutions, Inc.
