gaps between business and technology.

Oct. 01, 2005

A Certified Information Technology Professional (CITP) is a CPA credentialed as a technology professional and recognized for his or her unique ability to bridge the gaps between business and technology. This is a unique credential, unlike other certifications that recognize only a narrow scope of skills.

The AICPA credential encourages and recognizes excellence in providing technology-related

services by the profession. The AICPA provides the tools, training and support for CPAs to become technologically adept and to benefit the business and academic communities they serve.

There has never been a better time to become a credential holder. Here are the Top 10 Reasons to Become a CITP:

1. As noted above, a CITP is a CPA credentialed as a technology professional and recognized for his or her unique ability to bridge between business and technology, unlike others holding certifications that recognize only a narrow scope of skills.
2. Only CPAs can be CITPs, which further differentiates their unique blend of skills in the marketplace.
3. Every organization needs CPA.CITPs because they possess a blend of business acumen with IT expertise.
4. The credential is a mark of excellence for CPA business technologists who are leaders in industry, public practice, government and academia.
5. It provides the opportunity to move into new technology-related roles and opportunities.
6. CITP holders have access to a community in which they can share, debate, network and communicate with other CPA business technology experts.

7. The designation elevates the CPA business technologist to the executive
