From the January-March 2007 Issue

Every January, *The CPA Technology Advisor* provides this special **Tax Season Survival Guide**, offering a review of tax research applications, useful tips on preparing for the upcoming tax preparation season, and additional features and tax-specific resources. This year's Guide covers a variety of subjects, from tips for selecting scanners and paperless office systems, to strengthening storage and backup protocols, and insight into emerging technologies that will help shape productivity in accounting practices in the years to come. Additionally, contributors Dave McClure and Roman Kepczyk, CPA.CITP provide their technology predictions for 2007. We hope this guide helps you prepare for the busy season and year to come. □

[Busy as an Accountant During Tax Season](#)

It's that time of year — time for tax, audit, new business plans, new technology implementation and the cold of winter spreading over the northern half of the United States.

[Emerging Technologies](#)

Sometimes, developments in technology seem to be creeping along. At other times, the changes are occurring at a gallop. The emerging technologies that will affect your business for the next three to five years need to be understood and exploited. What are the top emerging technologies?

[Best Practices: Selecting a Scanner](#)

With paperless and document storage initiatives at firms and companies in full swing, one of the key components of any efficient process is the scanner. Even though scanners have come a long way since simple flatbeds, the choices and implementation can be overwhelming.

[Best Practices: Paperless Office Planning](#)

As each year passes and technology processes become more advanced, paperless (or less paper) solutions are increasingly popular throughout businesses of all kinds.

[Free for the Taking: What Can Google do for You?](#)

Apparently, there is such a thing as a free lunch — at least in Google Land. The Internet search Goliath is offering tax and accounting professionals and all other U.S. businesses free coupon advertising on its Google Maps site.

Which Version?

Well, here it is the middle of October (when I'm writing this column). The 2006 tax season is finally drawing to an end, and the 2007 season is only three months away — now that's depressing.

What are You Missing?

As the professional tax preparation market has seemed to grow smaller as a result of mergers and acquisitions, the capabilities of most of the programs on the market have actually grown considerably, with tax prep programs now offering all-in-one bundles where they used to offer modules for the various filing entities.

Tech Predictions for 2007

If the technology scene in 2005 was too boring for words, 2006 was downright strange. The major re-write of the Telecommunications Act, which would have overhauled video franchise rules nationwide...
