Celerant Technology, a privately held Corporation, provides high quality, advanced retail software that is supported by experienced professionals that offer personal attention to every retailer. Celerant Command Retail is a real-time management system that integrates all channels of a retail enterprise, including POS, warehouse, inventory management, sales back office, mail order/catalog and e-commerce. Celerant's custom, sophisticated websites expertly manage and market inventory, directly from your Command Retail system, eliminating the need to re-enter data, including product descriptions, customer information and online orders. Celerant's flexible catalog/mail order module, also built within the system, allows you offer multiple catalogs simultaneously and track the different codes, along with varying price levels. Our advantage is the flexibility of our Java platform and the tight integration, allowing retailers to manage all channels of their business with one, scalable, real-time system.
