a division of **ACTUATE.** | for the Enterprise

Xenos Enterprise Server (ES) simplifies the challenge of designing integrated business information architecture and process flows for both structured and unstructured data.

Xenos ES delivers organizational control over all data and document transformation from a centralized location within the enterprise. This improves operational efficiency, enhances business processes, reduces risk for compliance management and increases employee productivity with lowered total-cost-of-ownership both for the enterprise and for its customers.

Xenos ES allows for the high speed integration, composition, translation, transformation, indexing, repurposing, archiving, retrieval, routing, printing, delivery and presentment of structured and unstructured data throughout the enterprise. It makes possible the flexible sharing of previously inaccessible strategic information assets with customers, employees and trading partners.

CPA Practice Advisor is registered with the National Association of State Boards of Accountancy (NASBA) as a sponsor of continuing professional education on the National Registry of CPE Sponsors.
