May. 03, 2011

WHITE PLAINS, New York — May 3, 2011 — FUND E-Z Development Corporation (www.fundez.com), a leading provider of nonprofit accounting, fundraising and HIPAA billing software, today announced that Positive Pay, an automated fraud detection tool, has been integrated with FUND E-Z Nonprofit Accounting Software.

Positive Pay is a feature that provides nonprofit and governmental organizations protection against altered checks and counterfeit check fraud. Positive Pay allows nonprofit and governmental organizations the ability to create a file containing the checks they have issued and import those items into their bank's computer via email, web upload or FTP.

As checks are presented for payment the bank validates them against Positive Pay files. Unauthorized checks or checks with payees/amounts that differ from Positive Pay will not be paid. Instead the bank contacts the organization with unauthorized check details.

"FUND E-Z is proud to offer its clients anti-fraud protection through Positive Pay," said George Marcolini, vice president of marketing for FUND E-Z Development Corporation. "The seamless integration with FUND E-Z Nonprofit Accounting Software now allows nonprofit and governmental organizations a security feature that is offered by virtually every US commercial bank."
