CROSS-BORDER TRANSACTIONS

May. 09, 2011

RIVERWOODS, ILL., May 9, 2011– Calculating cross-border transactions to determine everything from international tax strategies to where it makes sense to do business is now easier with Comtax System software, available in the United States through CCH's partnership with [Comtax](#).

The partnership expands CCH's portfolio of comprehensive international tax products and software tools that help companies ensure compliance, simplify workflow and maximize profitability. CCH, a Wolters Kluwer business is the leading global provider of tax, accounting and audit information, software and services ([CCHGroup.com](#)).

“While this type of work is typically time consuming and prone to risk, Comtax System software enables businesses to efficiently reduce tax costs, minimize risk and increase the net results of cross-border transactions,” said Thomas Stitt, CCH Director of Corporate Market Strategy. “With Comtax System, established multinational businesses, those exploring international opportunities and tax consultants can plug in a wide range of financial variables to determine best practice models for moving forward.”

The Comtax System helps international tax professionals optimize net profit for dividend, interest, royalty as well as fee and capital gains cross-border transactions. It covers jurisdictional regulations in up to 129 countries and offers separate optional add-on modules for both Thin Capitalization and Capital Gains. The tool can also base calculations on up to eight intermediary countries (10 including source and recipient countries) and can build templates of optimal company structure and organizational charts.

Instant results for complex calculations showing the most desirable tax options
