eFileCabinet, Inc. recently announced its new SecureDrawer apps for Apple and Android mobile devices. eFileCabinet provides paperless software solutions for small businesses.

The new app allows users to securely exchange confidential files and communications with each other. Through the app, users can manage folders, drawers and change permissions for drawer access. Accounts can be linked together to manage client relationships and documents can be signed using SecureDrawer's electronic signature feature.

"eFileCabinet is focused on small businesses increasing their profitability. SecureDrawer is popular because it reduces the cost of sending critical files between businesses and clients, but it also increases the quality of service which means more revenue long term," said Matt Peterson, president & CEO of eFileCabinet. "With the iOS and Android mobile apps for SecureDrawer, we are now making access to this web portal even easier as more people use smart mobile technology to keep in touch with business needs."

The SecureDrawer mobile app is available for free from iTunes and Google Play Store.
