and Expense Management on the World's Leading Mobile OS for Smartphones

Feb. 22, 2013

NetSuite Inc., a provider of cloud-based financials / ERP software suites for business, has announced the availability of NetSuite OpenAir Mobile for the Android operating system, giving services businesses new mobile functionality to manage time tracking and expenses on the world's fastest-growing and most widely-used smartphone platform.

The new Android mobile app from NetSuite OpenAir, one of the world's leading cloud professional services automation (PSA) solution, complements a previously released mobile app for the Apple iOS to offer on-the-go services professionals more flexibility to quickly and easily access and manage critical business information from their device of choice from a client office, airport, home or any location in the world. More information is at www.netsuite.com/psamobile.

The release of the NetSuite OpenAir Mobile for Android app comes amid continued growth for Android in the smartphone market. The analyst firm IDC estimates that Android commanded 75 percent of the worldwide smartphone market in Q3 2012, about five times greater than the Apple iOS for the iPhone. Android's year-over-year growth rate of 91.5 percent for the 12 months ending on September 30, 2012 was nearly double the 46.4 percent growth rate of the smartphone market at large, according to IDC.

In the tablet market, the Android platform powered more than 44 percent of tablet shipments as of Q3 2012, second to the Apple iOS on the iPad, at 55 percent. To download NetSuite OpenAir Mobile for Android, OpenAir customers can go to https://play.google.com/store/apps/details?id=com.openair.java.android. NetSuite

OpenAir Mobile for Android is free and requires only a client's OpenAir credentials to

The app meets the need of mobile-powered services organizations for real-time, anywhere data and functionality to improve efficiency, utilization, customer service and cash flow. For example, services organizations that bill clients based on specific time and expense reports can accelerate processes and cash flow when consultants are able to enter time and expense data via a smartphone or tablet. NetSuite OpenAir Mobile for Android provides:

- Intuitive calendar interface to track and manage time
- Access to OpenAir timesheets and expense reports using the easy-to-use, familiar Android user interface
- Instantaneous synchronization with OpenAir accounts to utilize up-to-date customer, project, and task data

"Services professionals increasingly rely on smartphones and tablets while on the road or anytime they need to access an OpenAir account," said Ed Marshall, General Manager, NetSuite Services Vertical. "This new mobile app for Android puts the power of the cloud in the palm of their hand to perform more efficiently and speed time and expense reporting and approvals."
