eFileCabinet, Inc. has announced open APIs are now available for its entire product line. The new APIs are available for both the cloud and on-premise versions of its eFileCabinet and SecureDrawer applications. eFileCabinet provides document management software solutions for small and medium-sized companies.

“No matter the organization or the industry, everyone is looking at migrating their antiquated paper-based file system to a more collaborative and safe paperless system,” said Matt Peterson, CEO of eFileCabinet. “Whether it is a direct product-to-product integration or a more advanced white label or OEM partnership, we have a proven track record of delivering powerful end-user experiences.”

Interested developers can use **eFileCabinet's API developer tools** to build solutions for both the iOS and Android mobile platforms.
