**2013 Innovation Awards Nominee:**

## Checkpoint Interactive Decision Tools

[yourcheckpoint.thomsonreuters.com/interactivetools](http://yourcheckpoint.thomsonreuters.com/interactivetools)

Today's tax and accounting professionals have access to an overwhelming amount of information from myriad but often unrelated sources. It's no wonder that combing through this information to find that elusive answer to a client's particular tax, accounting, or auditing issue can sometimes feel like looking for the proverbial needle in a haystack. But what if there was an easy way to generate automated solutions to your most complex client issues?

**Checkpoint Interactive Decision Tools** enable practitioners to effectively address frequently encountered yet challenging tax, accounting, and auditing issues. Using a dynamic interview format and state-of-the-art web technology, each tool walks practitioners through the decision making process, giving them confidence they've considered all the relevant issues and arrived at the correct answer in a fraction of the time. By presenting only information relevant to a client's situation or fact pattern in the proper sequence, Interactive Decision Tools save time, empower less experienced staff to tackle more complex technical issues, and improve accuracy and consistency throughout the firm.

The twenty-three tax and nine accounting and auditing tools can be launched from multiple locations within Checkpoint, allowing users to begin the decision-making process at the point at which the issue arises in their workflow. Each tool begins with an overview and purpose statement about what it's designed to do. Embedded

calculations and links to primary source materials and expert editorial guidance
