2013 Innovation Awards Nominee:

Workpapers CS

cs.thomsonreuters.com/WorkpapersCS

Workpapers CS offers practitioners a completely new way to manage workpapers for tax engagements, with real-time online collaboration and a single-database structure that eliminates imports, exports, and syncing. It includes powerful tools for managing documents and data from a variety of sources. Workpapers CS is the next step in an evolving digital workflow that will help practitioners be more efficient in and out of the office and collaborate in new ways.

Especially useful for business tax engagements, Workpapers CS enables practitioners to process all types of live workpapers electronically, perform trial balance calculations, and manage workpapers with a convenient and intuitive tree structure—complete with review notes, signoff notations, and more. It offers sophisticated multi-monitor support, a powerful report and financial statement editor, and seamless integration with Microsoft Word and Excel.

Workpapers CS helps make the promise of a completely digital and paperless end-to-end tax workflow a reality for firms. It is available in a traditional on-premise configuration or as a cloud-based application.
