integration to offer an integrated accounting and payroll solution to small businesses and accounting professionals.

Taija Sparkman • Apr. 26, 2013

[Xero](#), provider of online accounting software, and [SurePayroll](#), provider of online payroll services, have announced an integration to offer an integrated accounting and payroll solution to small businesses and accounting professionals.

“SurePayroll truly pioneered online payroll for small business which is just one of the reasons we appreciate Xero’s disruptive spirit as they seek new ways to better service accountants and their clients,” said Rick Gunther, senior vice president, SurePayroll. “Additionally their end-to-end system offers a host of solutions to help increase efficiency for small business. With the integration available today to our clients, we look forward to growing this partnership together from this point forward.”

Through the partnership, professionals can manage their payroll and finances in one place, providing Xero customers with access to additional solutions for 401(k) plans, health insurance, workers compensation and employee screening. The integration is designed to make it easier for small business owners to access and maintain their financials and payroll in real-time from anywhere.

“The ability to make smart financial decisions is key for small business owners, but in order to do this they must have the right information,” said Jamie Sutherland, Xero president of U.S. Operations. “Our integration with SurePayroll empowers accountants and small business owners with a robust online solution that puts critical data at their fingertips and ultimately helps them better run their business.”
