Sage Launches Accountant Edition of Sage One

Sage North America announced the launch of a special version of its global Sage One small business solution which is designed for accountants with multiple clients.

Dec. 11, 2013

Dec. 9, 2013 – Sage North America announced the launch of a special version of its global Sage One small business solution which is designed for accountants with multiple clients. The application is the newest addition to the company’s portfolio of business management solutions for small and mid-sized businesses.

Sage One Accountant Edition allows an accounting professional to access all of his or her clients who use Sage One with a single login. The tool is designed to make it easier for accountants to collaborate with multiple clients in real time from anywhere.

The US version of Sage One was launched in 2012, and provides online accounting, invoicing, and task tracking for small businesses and entrepreneurs. Sage One Accountant Edition automatically downloads bank and credit card transactions from most US financial institutions, and is designed to provide end users and the accounting professionals who serve them with the information they both need to help their small businesses prosper.

Sage North America Vice-President and General Manager of Accountant Solutions Jennifer Warawa said, “Small businesses really want a trusted valuable advisor to make sense of their financials and offer advice and insights about their business. The Sage One Accountant edition gives accountants a tool which permits them to access all of their Sage One clients using a single login.”

The Sage One Accountant Edition is free for accounting professionals with multiple paying clients. More information on the Sage One Accountant Program is available at <http://na.sage.com/sageone-us/accountants>. Small businesses can learn more about Sage One by visiting www.sageone.com.
