New York.

Mar. 23, 2014

Last year, Americans took public transportation for a combined 10.7 billion trips, the highest yearly public transit ridership in 57 years. That's according to a report from the American Public Transportation Association (APTA).

This was the eighth year in a row that more than 10 billion trips were taken on public transportation systems nationwide. While vehicle miles traveled on roads (VMT) went up 0.3 percent, public transportation use in 2013 increased by 1.1 percent.

“Last year people took 10.7 billion trips on public transportation. As the highest annual ridership number since 1956, Americans in growing numbers want to have more public transit services in their communities,” said Peter Varga, APTA Chair and CEO of The Rapid in Grand Rapids, MI. “Public transportation systems nationwide – in small, medium, and large communities – saw ridership increases. Some reported all-time high ridership numbers.”

Some of the public transit agencies reporting record ridership system-wide or on specific lines were located in the following cities: Ann Arbor, MI; Cleveland, OH; Denver, CO; Espanola, NM; Flagstaff, AZ; Fort Myers, FL; Indianapolis, IN; Los Angeles, CA; New Orleans, LA; Oakland, CA; Pompano Beach, FL; Riverside, CA; Salt Lake City, UT; San Carlos, CA; Tampa, FL; Yuma, AZ; and New York, NY.

Since 1995 public transit ridership is up 37.2 percent, outpacing population growth, which is up 20.3 percent, and vehicle miles traveled (VMT), which is up 22.7 percent.

“There is a fundamental shift going on in the way we move about our communities. People in record numbers are demanding more public transit services and

communities are benefiting with strong economic growth,” said APTA President and

nearly 60 percent of the trips taken on public transportation are for work commutes.”

“The federal investment in public transit is paying off and that is why Congress needs to act this year to pass a new transportation bill,” said Melaniphy.

2013 Ridership Breakdown

Heavy rail (subways and elevated trains) ridership increased by 2.8 percent across the country as 8 out of 15 transit systems reported increases. Heavy rail in Miami, FL, saw an increase of 10.6 percent that was mostly due to increased frequency during peak service. Other heavy rail systems with increases in ridership for 2013 were in the following cities: Los Angeles, CA (4.8%); New York, NY (4.2%); and Cleveland, OH (2.9%).

Nationally, commuter rail ridership increased by 2.1 percent in 2013 as 20 out of 28 transit systems reported increases. With a new rail line that opened in December 2012, commuter rail in Salt Lake City, UT, saw an increase of 103.3 percent. The following five commuter rail systems saw double digit increases in 2013: Austin, TX (37.3%); Harrisburg-Philadelphia, PA (33.9%); Anchorage, AK (30.0%); Lewisville, TX (23.0%); Stockton, CA (19.9%); Minneapolis, MN (12.5%); and Portland, OR (10.3%).

Light rail (modern streetcars, trolleys, and heritage trolleys) ridership increased 1.6 percent in 2013 with 17 out of 27 transit systems reporting increases. Systems that showed double digit increases in 2013 were located in the following cities: New Orleans, LA (28.9%); Denver, CO (14.9%); and San Diego, CA (10.4%). Ridership in the following cities also saw increases in 2013: Seattle, WA – Sound Transit (9.8%);
