AdvanceFlow

Thomson Reuters

AdvanceFlow takes cloud-based audit management to a new level, providing enterprise-level processing power in a completely cloud-based application. Designed for the largest professional audit firms, it makes engagements, workpapers, and colleague communications available securely in real time from anywhere. The full functionality of the program is available on the cloud, including the power to process the most complex clients and the most data-intensive audits.

AdvanceFlow also offers some of the profession's most sophisticated working trial balance capabilities, providing the power to handle complex trial balance needs, even for large consolidation and fund clients. No other cloud-based application provides this level of power.

AdvanceFlow leverages the powerful GoFileRoom® platform, which is already used by the majority of top 100 accounting firms in the United States. It also integrates seamlessly with PPC's SMART Practice Aids™, GoSystem® Tax RS, UltraTax CS®, ProSystem fx® Tax, and Microsoft® Office.
