Financial information and technology company Thomson Reuters has released a special report, *[An Overview of the Revised Accounting Model for Revenue Recognition](#)*, which provides useful insights for corporate management teams, shareholders, lenders, analysts, investors, regulators, and accounting firms that utilize revenue to monitor organizations' financial performance and general financial health.

After years of deliberations between the Financial Accounting Standards Board (FASB) and the International Accounting Standards Board (IASB) regarding the appropriate accounting treatment for revenue going forward, on May 28 the FASB issued Accounting Standards Update (ASU) No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*.

This report from Thomson Reuters provides an overview of the update, examining its objectives and scope. It analyzes the update's recognition and measurement guidelines, contract costs, effective dates, and transition methods, organizing content according to the five-step revenue recognition process set by the standard.

Thomson Reuters is also launching the *[GAAP Critical Issues Series – Revenue Recognition](#)*, a new online product that provides detailed coverage of how to implement this new standard at an industry-specific level. The series highlights key

information and adds clarity through illustrations, examples, and expert
