technologies, has announced the availability of a new QuickBooks app for Mac OS devices.

Isaac M. O'Bannon • Jun. 17, 2014

Intuit, the maker of QuickBooks, TurboTax and many other business and financial technologies, has announced the availability of a new QuickBooks app for Mac OS devices.

QuickBooks app for Mac is the newest addition to the QuickBooks ecosystem, the number one cloud accounting solution for small businesses. Now Mac users have the option to leverage QuickBooks' easy-to-use design with an app they can access through the Mac menu bar that gives small businesses and accountants access to a robust, open platform that works for them anytime, anywhere.

"Small business owners who use a Mac can now access the power of the QuickBooks ecosystem while working with the operating system they know and love," said Dan Wernikoff, senior vice president and general manager of Intuit's Small Business Group. "This is another example of how we've turned QuickBooks into an open ecosystem of business management solutions that can be accessed from any device."

Business Management on Multiple Devices

The new QuickBooks app for Mac was designed to make managing a business from Mac OS even easier, with the option to not only use the new app but iPhone and iPad apps to ensure businesses always have access to their important business data. Through just one QuickBooks Online account, a business can access and interact with its data from a [computer](#), [iPhone](#), or [iPad](#). The app automatically syncs data between devices and users, so small businesses can manage their finances anytime, anywhere.
