www.cli-usa.com

APS Advance Practice Management, offered in the U.S. by Commercial Logic, Inc., is a widely used practice management system, and is part of the broader APS Suite, which includes document management, CRM, resource planning, online business intelligence and business process automation.

The system is designed to integrate and share data with professional tax compliance programs, financial management and accounting systems, and payroll applications, and offers total integration with Microsoft Office and SQL Server databases. This allows client data from across all areas of firm services into the APS system, which offers dashboard views and extensive drilldown functionality for effectively managing the processes of one or multiple professional practices or other organizations.

The system includes features for managing timesheets and expenses, including web-based timesheets, Outlook calendar integration, expense approval/sign-off processes and workflow and resource planning. APS' engagement/project management functions offer WIP tracking, support for multi-currency/multi-entity needs, milestone budgeting and assignment, and status and statistical reporting.

Other system modules include billing and invoicing, budgeting and planning
