new Bill.com iOS mobile app to provide small business owners with a seamless mobile solution for managing and paying bills on the go. This launch drives forward the Bill.com ...

Isaac M. O'Bannon • Jul. 09, 2015

Cloud-based invoice and payment automation company Bill.com has launched its new Bill.com iOS mobile app to provide small business owners with a seamless mobile solution for managing and paying bills on the go. This launch drives forward the Bill.com mission to automate payables and receivables processes from any device at any time.

“We are in the midst of a tremendous shift as the world of payments becomes digital, and increasingly mobile,” said René Lacerte, CEO of Bill.com. “At Bill.com, we are making sure no business is left behind. That is why we are so thrilled to introduce a new mobile platform. It is built on the Bill.com platform to provide small and medium-sized businesses with a fast, secure and easy way to manage payments from their mobile device.”

To navigate the changing payments landscape, small business owners desire solutions that are secure, built for the cloud, and mobile. The newly launched

Bill.com mobile app provides business owners with the tools they need to manage

Bill.com mobile app users have a comprehensive view of their payment history, with full access to original invoices and the complete trail of approvers needed to make informed payment decisions.

The Bill.com mobile app is available today on iOS and is coming to Android in the coming months. The iOS version is free for existing Bill.com users and is optimized for iPhone, iPad, and iPod Touch and can be downloaded in the [iOS app store](#).
