Companies

As part of the new relationship, the two companies will integrate Intacct's cloud ERP software with ADP Workforce Now®, a comprehensive HCM suite built to reduce administrative chores and help keep companies compliant.

Nov. 17, 2015

Cloud ERP software maker **Intacct** has partnered with ADP to help midsize companies streamline their back-office processes, the companies have announced.

As part of the new relationship, the two companies will integrate Intacct's cloud ERP software with ADP Workforce Now®, a comprehensive HCM suite built to reduce administrative chores and help keep companies compliant.

The integration between Intacct and ADP will help midsize companies reduce errors and eliminate rework. Companies will be able to easily sync employee data and post payroll entries from ADP to their General Ledger within Intacct. Instead of typing payroll data twice, information can be securely uploaded into Intacct with a few mouse clicks—dramatically reducing the chance for errors and saving significant time and effort.

System One, a leading provider of specialized workforce solutions and integrated services, has already benefitted from an integration of Intacct and ADP for more than

a year. As a staffing company, it has to process payroll for approximately 6,500

technology to boost staff productivity and give their company flexibility for the future,” said Scott Lumish, VP of Business Development at Intacct. “As a company grows, any areas of the business that lack automation become potential breaking points and can trigger a vicious cycle of inaccurate data, longer close processes, and slower decision-making. By integrating Intacct and ADP, we’re helping our joint customers eliminate inefficiencies and drive increased automation into their back-office processes to facilitate growth.”

“When HR leaders spend hours a week rekeying data between multiple back office systems, employee engagement can take a back seat. This, in turn, can have a negative effect on both company culture and business growth,” said Amit Jain, Division VP, Strategy & Business Development for ADP’s Major Account Services business. “By streamlining all of their HCM applications with targeted integration, we’re allowing companies to spend less time on administrative tasks and more time with the people who will help their business grow and thrive.”

The integration between Intacct and ADP is expected to be generally available on both the [Intacct Marketplace](#) and the [ADP Marketplace](#) in the first quarter of 2016.
