BASIC SYSTEM FUNCTIONS: 4.25 Stars

QuickStore's main user interface includes a drop down menu at the top of the screen that offers easy access to system functions such as Lists, Activities, Reports, Setup, and Maintenance. A series of icons below offer access to frequently used functions such as New Sale, Item, Customer, PO, Receive, Tags, Orders, and Clock. To process sales, click on the New Sale icon, where users can choose from a variety of sales options including New Sale, Layaway, Gift Certificate, and Quote. Users can quickly scan products, or enter a product number.

Options are available for looking up product codes, and users can also search for an existing customer, or add a new customer on the fly. Users can accept multiple tender types, including multiple types for each transaction. Along with general sales, users can also enter other transactions such as layaways, special orders, and customer quotes. User roles are defined upon system setup, and consist of six separate areas; customers, inventory, maintenance/miscellaneous, reporting, sales, and setup. Each user is assigned a user level, which will determine system accessibility.

The RapidStart product is ideal for the single store that does not process a large amount of transactions. The Professional solution is also designed for the single store that needs multiple checkout options, and a large selection of inventory. The Multi-Store option can easily handle multiple store locations, and uses polling technology to pull sales data from other stores into the main system.

Each product can be assigned up to five different prices, and users can easily adjust pricing levels in the inventory management function, with the ability to adjust pricing formulas, retail prices, and cost prices using a variety of methods such as percent or fixed amount.

SPECIALIZED FEATURES/SERVICES: 4 Stars

QuickStore easily integrates with touch screen monitors, and the pre-packaged

levels for each customer. QuickStore easily processes transactions such as layaways, handles quotes, special orders, and gift certificates. Designed specifically for retail businesses, QuickStart is not suitable for restaurants or grocery stores.

TRACKING/REPORTING: 4 Stars

QuickStore offers a solid selection of reporting options in five categories; Sales, Inventory, Customer, Lists, and Other. Sales reports such as Daily Checkout and Sales by Clerk help track daily transactions are available, as well as inventory reports such as Inventory Summary and Inventory Aging track and manage daily inventory levels.

Top 40 Items by Type allow managers to track best-selling products in their inventory, and Sales by Customer and a Customer Birthday report allow retailers to track and manage buying history and personal demographics for their best customers. There are also a solid selection of cash drawer reports, such as the Actual Cash and Credit Count, and the Shift Summary, which provides a total for each cashier. The Time Clock Detail report allows managers to print a detailed report for each employee that includes shift hour detail and any overtime worked and includes a detailed record of all transactions processed during their shift.

All QuickStore reports are processed in real time, with totals adjusted as transactions are entered.

INTEGRATION/IMPORT/EXPORT: 4 Stars

QuickStore POS is just one of the many products offered by Wasp Barcode, which also include inventory control, asset management, time & attendance, and bar code technology software. All products integrate easily, and a GL interface is also available for those using QuickBooks products.

While bundles can be purchased that include both hardware and software, users can

tutorials designed to guide new users through system setup and general operational functions such as general navigation, store setup, and inventory management. The website contains a terrific selection of tools for users to choose from including a comprehensive knowledgebase, a selection of product tutorials, and a getting started option. Product demos are available to download if desired and training options include both instructor led training as well as on-site training options. There is also an online user support manual that can be downloaded from the website as well.

Technical support hours are 8:00 AM to 6:00 PM Central Time, with live chat support available. Users can also access toll-free telephone support, as well as request support online.
