access and collaboration. The WorkForce WF-2760 includes built-in Ethernet, which makes sharing the printer on a network quick and easy, as well as support for NFC touch-to-print capabilities.

“The Epson WorkForce printer portfolio is designed to meet the needs of a wide range of businesses and the new WF-2700 printers are fast, reliable and versatile offering easy to use features ideal for home offices,” said Steve Michelle, product manager, Printers, Epson America. “In addition to the convenience enabled by a range of wireless printing options, the WF-2700-Series delivers the high quality prints for which Epson is known, due to the incorporation of PrecisionCore technology.”

Laser-like Performance: Powered by PrecisionCore

The WorkForce WF-2760 and WF-2750 are powered by PrecisionCore, Epson's next generation technology. PrecisionCore features Epson's advanced thin-film piezoelectric (TFP) elements, which are produced via a MEMS manufacturing process using semiconductor micro-fabrication techniques. At the core of this proprietary technology is the PrecisionCore MicroTFP print chip that can be arrayed in various printhead configurations. Each nozzle on the printhead delivers up to 50,000 droplets per second for increased precision and print quality.

Additional WorkForce 2700-Series features include:

- Fast print speeds – professional-quality prints at speeds of 13.7 ISO ppm (black) and 7.3 ISO ppm (color)
- Efficient and productive – 150-sheet paper capacity, 30-page automatic document feeder (ADF) for copying and scanning, and auto two-sided printing
- Affordable individual ink cartridges – replace only the color needed
- Economical – uses up to 70 percent less power than laser printers

- Documents that last – DURABrite® Ultra instant-dry inks for smudge, fade and
