The Trueblood Seminars continue a long-standing tradition of assisting those charged with developing curricula that is futuristic and embodies the spirit of innovation.”

This year's seminars marked a continued focus on audit innovation as technology continues to change the face of the profession. The proliferation of data analytics and artificial intelligence has enhanced the audit process and has helped open the door to transforming the manner in which an audit is conducted. The result is a new type of auditor and deeper insights that can benefit companies being audited and provide value to capital market participants. Additionally, there is an appreciation among business leaders for the opportunities audits can provide to help companies improve business performance.

Participants analyzed case studies on leasing arrangements, accounting for cross-hedging instruments, business combinations, revenue recognition, and understanding and evaluating control deficiencies during an audit, among others.

“Case-based discussions are a critical component of the seminars because they present realistic, complex, and contextually rich situations that encourage critical thinking and professional judgment,” said Michael Iselin, 2017 Trueblood co-chair and accounting professor at the University of Minnesota. “Faculty are able to return to their universities and use Trueblood case studies as an excellent tool to foster critical thinking skills in the classroom.”

More than 2,100 professors from across the country are registered users of the Trueblood case studies.

The 2017 Trueblood Seminars were held at Deloitte University in Westlake, Texas. More than 60 leading accounting and auditing educators and professionals attended the February and March sessions. The program featured guest speakers from the

Through this lens, the Trueblood Seminars continue to give accounting and auditing professors curriculum resources they need to educate the auditors today's business world demands.

The Robert M. Trueblood Seminars have been held annually since 1966 under the auspices of the Deloitte Foundation. In 1975, the American Accounting Association joined the Deloitte Foundation in administering the seminars. Through the years, more than 2,400 professors have attended the program.

The Deloitte Foundation, founded in 1928, is a not-for-profit organization that supports education in the U.S. through a variety of initiatives that help develop the talent of the future and their influencers and promote excellence in teaching, research and curriculum innovation. The foundation sponsors an array of national programs relevant to a variety of professional services, benefiting middle and high school students, undergraduates, graduate students and educators.
