## New Version of CPA Exam Released

By Isaac M. O'Bannon, Managing Editor

The [American Institute of CPAs](#) (AICPA), National Association of State Boards of Accountancy (NASBA) and professional testing company Prometric have released the latest revised version of the Uniform CPA Examination.

The next generation exam, which began testing on April 1, has added additional assessment of higher-order cognitive skills that test a candidate's critical thinking, problem solving and analytical ability. The exam also makes greater use of task-based simulations (TBSs) as a means of assessing these higher-order skills. Recent research confirms that CPAs are now performing tasks that rely upon these skills earlier in their careers.

“The roles and responsibilities of newly licensed CPAs are constantly evolving, so it’s

president and chief operating officer. This strengthens the public protection role of Boards of Accountancy by enhancing the examination portion of the licensing model (education, examination and experience) used to regulate more than 700,000 licensees throughout the U.S.,” she continued.

Among the most important changes to the CPA Exam:

- **Exam Blueprints** containing approximately 600 representative tasks across all exam sections are available on the AICPA website. The blueprints replace the Content Specification Outline and Skill Specification Outline.
- The Exam remains composed of the four existing sections: Auditing and Attestation, Business Environment and Concepts, Financial Accounting and Reporting, and Regulation.
- Total CPA Exam testing time increased from 14 to 16 hours – four sections of four hours each.
- A new, 15-minute standardized break during each section that will not count against a candidate’s testing time has been added.
