Manage Spending Against Budget Information in Real Time.

Incorporating budget planning data into ExpenseWatch empowers you to make intelligent and informed decisions about spending before commitments are made, enabling true accountability. You can see exactly where you stand against your planned spending by company, business unit, department and G/L account.

With monthly and annual Budget vs. Actual information incorporated into every purchase requisition and expense report, managers can approve/disapprove spend based upon real-time information without having to wait for post-period spending reports.

- **Budget vs. Actual Reporting**

Budget vs. Actual reports keep you up to date on company spending in real time, enabling you to adjust spending to prevent budget overruns. Whether you use all the ExpenseWatch modules or just one to control a specific area of spending, you can track spending as fiscal periods progress without having to wait for post period reports.
