SSAEs, SSARs, PCAOB auditing standards, and interpretations. *Wiley GAAP 2018: Interpretation and Application of Generally Accepted Accounting Principles* is a thorough study and analysis of all US Generally Accepted Accounting Principles (GAAP).

“This deepened commitment is a result of the overwhelmingly positive response we’ve seen from both our existing customer base and the market as a whole,” said David Pugh, SVP Professional Learning, John Wiley & Sons. “There is strong demand for a cloud-based solution that combines and automates the engagement methodology. We will continue to build on our success to date in order to strengthen and expand our joint offering.”

This spring, the companies plan to launch programs compliant with IFRS and international audit standards within the AuditFile platform. Going forward, they plan to continue to expand the content available within AuditFile to automate additional programs and give users access to Wiley’s expansive digital resources for the accounting profession.

Along with the 2018 programs, AuditFile recently released several new features designed to enhance the user experience and more tightly integrate Wiley’s content into the AuditFile platform, including automation of the Wiley Disclosure Checklist and the ability to easily create new workpapers from the Wiley practice aids inside AuditFile using the platform’s integration with Microsoft Office Online.

“We’re honored to partner with a company like Wiley that has such a long history and strong reputation within the profession,” said Gary Bong, CPA, a founder of AuditFile. “Based on the positive response from firms of all sizes, we see a real opportunity to move quickly to realize our shared vision of a completely automated and comprehensive solution for audit professionals.”
