MetaTasker**PT**

MetaTaskerPT – a web application assisting property tax groups with data entry. MetaTaskerPT intelligently extracts strategic data from property tax documents (ie. tax bills and notices) and directly imports them to a property tax management system. MetaTaskerPT is scalable and capable of accommodating high volume incoming document peaks experienced during property tax cycles. The data extraction process utilizes a combination of machine learning and virtualized labor approaches to achieve a highly accurate, comprehensive, and cost-effective solution. Additionally, MetaTaskerPT can be used as a stand alone system to process and procure property tax payments.

- Web Accessible, Cloud-based Application for Property Tax Document data extraction
- Automates property tax data entry workflows through robotic process automation
- Utilizes combination of OCR, machine-learning and secure workforce
- Supports multiple property tax document types
- Displays all extraction related metrics on a dashboard
- Displays all scanned documents with associated extracted data
- Provides ability to view statuses and tasks to team members
- Stores all documents allowing for searches and quick retrieval
- Integrates automatic data exports with multiple property tax management solutions including TotalPropertyTax
- Facilitates property tax payments through additional property tax payment module
