Although Excel has a Macro Recorder for automating tasks and processes, there's a limit to what the Macro Recorder can do. Where the Macro Recorder's functionality ends, VBA takes over. In this session you will learn how to create and edit macros using VBA rather than Excel's Macro Recorder. This webinar gets you started with VBA. It's aimed at advanced users of Excel, with little or no programming experience, who wish to take their level of automation knowledge beyond the Macro Recorder.

- Cost: FREE
- Date and Time: October 8, 2018, 9:30 -11:00 a.m. EDT
- Duration: 1.5 Hours

- Presented by: CPA Academy
